Rigveda IV.58.3.*

Agni is depicted here as having four horns, three legs, two heads, and seven hands. He is the mystic celestial Bull (Indra or Sun), three-fold connected, eloquently proclaiming the luminous within every mortal. The ram connected with sacrificial rituals is His conveyance. He is “yajñasya devamrtvijām.”(Lord of all yajnas)

Astronomically speaking, this mantra indicates a samvathsara. The four shringas or horns are the two equinoxes and two solstices (at 90°, 180°, 270° and 360°) on the wheel of time. The four horns divide the wheel of time into 3 padas (months) each. Two sheershas or heads are (1) Utharayana comprising of vedic months: *tapa*, *tapasya*, *madhu*, *mādhava*, *śukra* and *śuci* and (2) Dakshinayana covering : *nabha*, *nabhasya*, *iṣa*, *ūrja*, *saha ānd sahasya*. Three fold bound indicate the to and fro movement of the sun from the tropic of Cancer, the Equator and tropic of Capricorn. Seven hands are the seven day of the week or spectrum of the Sun.

According to a different view four horns, three feet, two heads and seven hands expressed as 43,20,000,000 indicates the cosmic time duration of a Kalpa.

In 20,000 years where were the vedic Nakshatras

After V.E.2020 Purva Bhadrapada(No.24) Nakshatra's balance duration wii be 453 years

Vedic Nakshatra, their Devata and span in years. Conjunction with cardinala shankranthis calculated for Vernal Equinox every 1000 years from 10,000 BCE to 10,000 C.E. Sign (-) indicates BCE and (+) CE. Blank columns does not mean that particular nakshatra was/or will not be at that cardinal point any time. Just in the 20 tables prepared for every 1000 years, they did not cover that point. The order of nakshatras are as menioned in Taittiriya Brahmana nakshatra suktha
